Manchester School of Architecture (MSA) EXCHANGE PROGRAMME
2008/09

Exchange students wishing to study within MSA must have completed a minimum of 3 years undergraduate study of architecture on joining the programme in Manchester. Exchange students are not required to submit a portfolio of work for admission to the programme but must have strong references and academic grades as per the standard exchange entry requirements. There are a very limited number of places for exchange students within MSA and early application is strongly advised.

Exchange students within MSA undertake a standard programme of study, as outlined below.

**Semester Exchange students:**

**Semester 1**
- 20 credits technology parts A and B
- 40 credits Design studio
- Plus: Research Methods and History and theory course (attendance only - no credits)

**Semester 2**
- 20 credits technology parts A and B
- 40 credits Design studio
- Plus: UK Professional Practice Management (attendance only - no credits)

**Year-long Exchange students:**

40 credits Dissertation (Research methods course and History and theory course plus Dissertation)

OR

40 credits technology: parts A and B **and** C and D

AND

80 credits Design studio

Plus

UK Professional Practice Management (attendance only - no credits)

**Lectures**

All students can in addition attend the programme of staff and visiting lectures semester 1 and 2.
Studio programmes are directed by ‘colleges’ and the theme and content changes year on year, and within the parameters of the college, is also negotiated with the individual student. The studio environment involves one day a week of tutorials, workshops or critiqued presentations. Visiting critics and lecturers can also contribute. The college programme sets out a series of architectural briefs, to which the students are expected to respond. Allocation to a college/studio will be determined on arrival in discussion with the adviser within MSA. Student preference for a particular college will be taken into consideration but cannot be guaranteed.

You can see the current colleges at: http://www.msa.ac.uk/study/colleges/
This will give you a feel for the types of areas in which you could specialise but please note that decisions regarding allocation to a college can only take place on arrival.

Professional Practice and management
A series of lectures and assignments on UK practice management, statutory requirements, development control, construction law and professional conduct.

Dissertation
An academic, 8-10,000 word written exploration of the History and Theory of architecture. Supported with a research methods lecture course, with assignments for the development of a research topic alongside an inspirational history and theory course. Dissertation supervision is then provided for the production of the document.

Technology
Parts A and B.
Part A: Essay on technological position based on case-study research leading to a proposal for an extended investigation
Part B: detailed exposition of an aspect of technology, the form chosen by the student.

Part C and D.
A structured framework of drawings and specifications produced in a report on a studio design project, demonstrating understanding of compliance to UK statutory and legislative requirements.
